8.	RACHIT MISHRA	201201092
9.	SHIVANI THAKKER	201201108

## Document Description:

This document intends to analyse the financial and technical feasibility of the project for the developer team. The primary purpose of this report is to give an abstract definition of the problem, formulate different solution strategies, examine alternative solution strategies keeping in mind the benefits, resources, input, cost, time and development related issues and reaching the best solution under current circumstances.

Objective .....	3
Feasibility Analysis .....	4

## **Introduction:**

The main objective of this project is to provide a platform to students of standard 8 to 12 and for teachers of respective subject and standard. After registering students and teachers are able to access this system. Teachers can upload the course related material (i.e. lecture notes, assignments etc.) and students can use this for their study reference. Also students can ask study related doubt on forum and teachers of respective course respond to it.

## **Document Conventions:**

The following conventions would be followed throughout the document:-

Heading 3: Arial, 18, Bold

Body: Arial, 14, Black

## **Objective:**

The objective is to effectively put in place a system, a platform that brings together teachers and students. The idea is to make education system better and hence make education interesting and easy.

If we dissect it from the point of view of different entities,

1. From teacher's perspective, they can upload the study material on the portal and they also can keep track of attendance.
2. From student's perspective, they can view or get an archive which is uploaded by respective teachers.

## Feasibility Analysis:

- For 9 members in group, it is very less work as it can be complete by 4-5 members also. And in that case half group end up with very less contribution.
- It was very common idea nowadays and our group wanted to do something new and different.
- If this kind of facility is provided there are many others points which resist us to developing such thing. Mobile and computers have such application which can lead students out of the track. We all know that in this precious time of education career no one wants to destruct their future.
- All those students who don't have mobile and computer will not be able to use such kind of facility.

So, though it is such a good idea due to above reasons we dropped this concept and decided not to make such application or website.
